

## **White Collar Criminal Defense**

Our attorneys advise and represent clients in internal investigations, regulatory enforcement investigations, grand jury investigations, proceedings by federal and state government agencies, and trials involving allegations of violations of federal and state antitrust laws, federal and state criminal and civil False Claims Acts, tax laws, environmental laws, as well as bank fraud and government contract fraud.

We partner with clients in designing and implementing targeted corporate compliance programs. We also proactively execute strategies to prevent criminal charges from being filed. However, when it is necessary to defend criminal or civil charges, our depth of experience in the substantive legal areas of enforcement allows us to develop strategies to affect the best result for the client - whether it be settlement or a vigorous defense to any charges that may be brought against our clients.
