

Antitrust & Unfair Competition

Every day, our attorneys put their expertise to work resolving the controversies that clients confront in a competitive environment. While our preventive counseling strives to help clients avoid potential pitfalls, disagreements that require the talents of the firm's trial attorneys often arise. Our Antitrust attorneys routinely defend businesses involved in traditional antitrust issues, including monopolization; vertical resale restrictions; price discrimination; mergers, acquisitions, and divestitures; trade regulation; and unfair competition matters.

We have enjoyed great success in cases revolving around complex federal statutes, including the Racketeer Influenced and Corrupt Organizations Act of 1970 (RICO), the Clayton Act and the Sherman Act. We also regularly advise our clients on formation and operating issues concerning antitrust compliance. In addition, we regularly advise our intellectual property clients on antitrust issues.
