Husch Blackwell ranks among the top three firms for acceleration in the 2026 Chambers Advantage Index, with the third-strongest growth trajectory in Chambers' nationwide market analysis. The recognition places Husch Blackwell among the firms showing the greatest momentum in the index and highlights gains in both the breadth and depth of its Chambers rankings.

"This recognition validates the high quality and sophistication of the work our attorneys handle and the exceptional caliber of talent across Husch Blackwell. Above all, it reflects the trust our clients place in our teams to take on their most complex challenges and help them achieve their business goals," said Joe Glynias, Chair of Husch Blackwell. "That trust is earned through the judgment, collaboration and commitment our attorneys bring to every engagement. We've seen for some time that our momentum is setting us apart from other firms, and it's gratifying to see Chambers' analysis confirm our position among the market's fastest-accelerating firms."

From 2021 to 2026, Husch Blackwell's Chambers rankings increased from 18 to 59, a gain of approximately 228%, while individual rankings rose from 43 to 158, an increase of approximately 267%.

The Advantage Index also highlights gains in the depth of Husch Blackwell's recognition. According to Chambers' firm-specific analysis, only Kirkland & Ellis and Latham & Watkins added more Band 1 rankings over the past five years, highlighting Husch Blackwell's unique and outsized momentum in the industry. During that period, Husch Blackwell also achieved eight ranked departments in the premium practice categories used in the index.

It is this growth that earned Husch Blackwell a top position in the “Accelerating Challengers” cohort. The index assesses firms using both current market position and growth trajectory, with trajectory incorporating ranking growth across 10-year, five-year and one-year periods.

The firm’s growth continued in the most recent rankings cycle. Between 2025 and 2026, the firm added 12 firm rankings and 29 individual rankings, increases of approximately 26% and 22%, respectively.
