Topics and Trends: Renewable Energy Projects in 2018

As renewable energy project margins continue to narrow, companies search for efficient, effective ways to cut costs. Our 2018 webinar series will describe the stages of a transaction to aid participants in conducting internal evaluations and will highlight areas where planning (or lack thereof) tends to drive outside counsel costs.

In the second installment of the series, Husch Blackwell attorneys will focus on best practices with respect to Engineering Procurement and Construction (“EPC”) Contracts, Operations and Maintenance (“O&M”) Agreements and Asset Management Agreements. The conversation will provide an overview of key agreement provisions and how they can protect against recurrent issues as well as special considerations for negotiating and administering these agreements. Future installments will discuss project acquisition and disposition, transaction structuring and project permitting, among other subjects.

Presenters

Michael L. Fisher, Attorney

Grant D. Leach, Attorney

Date and Time

Thursday, June 28, 2018

Noon - 1:00 p.m. CDT
