

Abby Jordan

PATENT ENGINEER

ST. LOUIS, MO

PHONE: 314.345.6860

EMAIL: ABBY.JORDAN@HUSCHBLACKWELL.COM

OVERVIEW

Abby helps transform clients' innovative ideas into protected inventions by supporting attorneys throughout the patent application process. Drawing on her engineering background, she assists in analyzing new technologies and developing technically accurate patent applications that safeguard inventors' ideas.

Abby has long been interested in the intersection of technology and law. Her engineering experience confirmed her desire to pursue a career that combines technical problem-solving with legal analysis, ultimately leading her to patent practice.

Before joining Husch Blackwell, Abby interned with a multinational construction, architecture, and engineering firm on the Power Transmission and Distribution team where she gained hands-on experience with substation protection and control systems while developing a strong foundation in electrical engineering. This experience continues to inform her ability to understand complex technologies and effectively support clients' IP goals.

Today, Abby works with IP attorneys on patent drafting and prosecution matters involving a range of engineering technologies, including power electronics, telecommunications, and semiconductors. Her work includes preparing patent applications and responses to patent office actions, applying her technical knowledge to identify and communicate the unique aspects of each invention. She appreciates the
