OVERVIEW

Leveraging enthusiasm and understanding of law, engineering, and innovation, Sam collaborates with clients to protect and leverage their groundbreaking ideas.

Beginning as a technical aide in an entry-level engineering position, Sam's initial career path was focused on the intricacies of the healthcare industry at 3M. While passionate about engineering, Sam discovered a preference for legal aspects and supporting inventors.

Sam is particularly enthusiastic about being on the cutting edge of technology, navigating the dynamic landscape of patent prosecution. His role involves regular interaction with the U.S. Patent and Trademark Office, where he obtains patents and evaluates client portfolios. While primarily focused on patent prosecution, Sam also has experience with patent litigation, trademark, and copyright matters.

His client experience ranges from solo inventors and entrepreneurs to startup companies and large corporations. Sam takes pride in counseling individuals having varying degrees of familiarity with the foreign and domestic patent systems, demonstrating a versatile skill set.

Sam prides himself on being an attorney who is personable and approachable. Known for thinking critically and getting it right the first time, Sam is a trusted advocate for clients navigating the complex intersection of law and technology.
