# CRYPTO, DIGITAL ASSETS, & BLOCKCHAIN

As the use of cryptocurrencies, blockchain technology, decentralized finance (DeFi), nonfungible tokens (NFTs), decentralized autonomous organization (DAOs), Web 3.0 applications, and other digital assets continues to emerge and evolve, compliance with the growing web of regulations, navigating the complex legal issues surrounding this potent decentralized technology, and resolving disputes is increasingly difficult. Husch Blackwell advises clients on the rapidly developing compliance and operational landscape to capitalize on the opportunity provided by these burgeoning technologies.

Our cross-disciplinary team, consisting of transactional, securities, tax, regulatory, government enforcement, intellectual property, energy, finance, private wealth management, and bankruptcy attorneys, leads clients through the emerging regulatory and compliance requirements related to crypto, blockchain, NFTs, and Web 3.0. Most members of our team have earned certificates in blockchain technology to ensure that they understand the intricacies of this emerging area and how to apply their legal experience to it.

As the adoption of decentralized ledger technology and smart contracts expands, their importance and potential to revolutionize many industries, including financial services, intellectual property, logistics and supply chains, the internet of things, energy, health care, insurance, and the sharing economy, continues to increase. Husch Blackwell is ideally positioned to provide the legal support and business guidance

Tax

### **HUSCHBLACKWELL**

Tax implications of cryptocurrency sales and trades Tax implications of digital asset sales and exchanges

## **Representative Experience**

Advised the founders of CULedger, a technology company that sought to bring blockchain solutions to the credit union industry. Our team organized the company and drafted a complex operating agreement that took into account state and federal regulations and the unique governance approaches of CULedger's company's credit union owners. We prepared a private placement memo and drafted licensing and other technology agreements with third parties. Financing was successful, and CULedger was on its way to developing applications using the power of blockchain to serve credit unions and their members.

Reviewed and negotiated blockchain participation agreement for client in transportation sector participating in supply chain blockchain application.

Reviewed and negotiated partnership, investment documents, and side letter for dozens (typically about four to eight large investments per month for different limited partner investment firms) of venture, private equity, real estate, hedge, and cryptocurrency/blockchain investment funds for family offices and large state pension funds. Investment size ranged from \$5 million to \$250 million (or more) each.

Conducted multistate loan document review for first fintech
