HUSCH BLACKWELL

HB CANNABIS COMPLIANCE

Members of the Husch Blackwell Cannabis Law Team have always helped clients navigate the complex and ever-changing regulations governing the state legal cultivation and sale of marijuana, industrial hemp, and cannabidiol (CBD). Now, Husch Blackwell's nationally recognized marijuana practice is launching four new regulatory management services.

License Management: HB Cannabis Compliance allows boutique marijuana operators to reduce their administrative burden and outsource their marijuana license management and compliance obligations to our team for a fixed yearly rate. With Husch Blackwell acting as an in-house legal team, operators will have increased bandwidth to focus on matters for company growth while having the peace of mind that comes with knowing their compliance management is in the hands of an Am Law 100 firm that has been a part of the marijuana industry since its inception.

Nationwide Surveys & State-by-State Renewal Guides: Keeping track of the ever-changing state regulations and renewal requirements is challenging but necessary for businesses. Our team provides clients with it all. We offer comprehensive 50-state surveys needed for a specific rule or inquiry as well as individual state and local checklists for new applications and renewals that include all regulatory requirements.

Location Intelligence Solutions Designed by Husch Blackwell's Data Science Team: Location Intelligence Solutions designed and developed by Husch Blackwell's Data Science Team, provides interactive

mapping for client location data. Plot datasets and perform diligence for new locations and acquisitions like large retail chains do. Originally built to help our clients with antitrust issues, our team can rapidly build custom mapping to view competitor locations, zoning, population density, traffic, and other economic indicators over each of your locations. Add distance rings to sites and view location-specific data such as regulatory set-off requirements, customize your maps to fit traditional styles or use branding to fit your organization, explore urban locations with building overlays and 3D street views. Location Intelligence Solutions can help clients understand their data and empower their next move.
